KOTEM To Show Newest Version of SmartProfile® GD&T Evaluation Software at IMTS 2012

*For Immediate Release
Budapest, Hungary
July 2, 2012*

KOTEM Ltd., a division of Quality Vision International Inc. (QVI®), announces the release of SmartProfile 2.0 — the all-new version of its popular GD&T evaluation software. SmartProfile provides fast, accurate analysis of measured data compared to a part's CAD model using Geometric Dimensioning & Tolerancing. SmartProfile can be used to confirm design intent for Shape, Form, Profile, Orientation, and Location on any rigid part. SmartProfile works with point cloud data from any measurement system, and Version 2.0 includes the SmartViewer™ interactive point cloud viewer to quickly visualize measured data as a color overlay on top of a CAD model.

KOTEM will show SmartProfile 2.0 at IMTS 2012 in Booth E-5602, East/Lakeside Hall.

About KOTEM Ltd.

KOTEM is recognized as the world leader in data fitting and GD&T evaluation software for industrial measurement. The company maintains offices in Rochester, NY, and Budapest, Hungary. KOTEM is a division of Quality Vision International, Inc. Company and product information is available online at www.kotem.com.

About Quality Vision International, Inc.

Quality Vision International is the global leader in optical dimensional measurement technology. Its brands include Optical Gaging Products, RAM Optical Instrumentation, VIEW Micro-Metrology, Certified Comparator Products, and KOTEM Ltd. QVI specializes in making advanced optical measurement technologies practical and easily accessible for everyday use in manufacturing. More information is available online at www.qvii.com.
