# PROVEN PRECISION

Since 1969, C&A Tool has proven itself through dynamic leadership, unparalleled expertise and major investments in the latest equipment—an approach that has helped us remain a leader in the high-precision contract manufacturing industry for five decades.

With three locations, more than 750k square feet of manufacturing space, 650+ employees, and \$100M+ in annual revenue, C&A Tool is a member of the MinebeaMitsumi family of companies, a world leader in precision components manufacturing.

From turning and grinding, to additive manufacturing, milling and machining—including the industry's most advanced capabilities in large machining—we have the country's largest collection of for-contract equipment, on-site and ready to deliver.

Whatever you need, we can do it.  
*And we can prove it.*

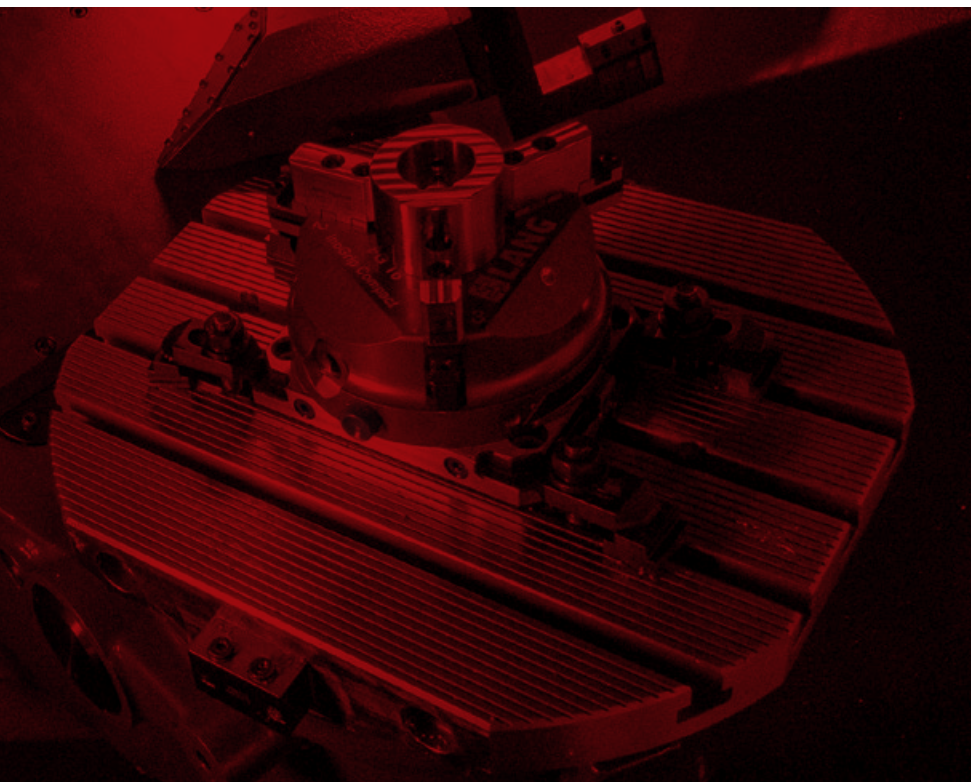

**WE MEASURE  
OUR WORK  
IN MICRONS  
AND OUR  
EXPERIENCE  
IN DECADES.**

## **CERTIFICATIONS:**

- ▶ AS 9100D
- ▶ IATF 16949:2016
- ▶ ISO 9001:2015
- ▶ ISO 13485:2016
- ▶ NADCAP: Nonconventional Machining
- ▶ FDA Registered

# MANY INDUSTRIES. ONE LEADER.

As a leader in for-contract manufacturing, the industries we serve are many and diverse. From aerospace, to medical, to industrial, we have the experience, expertise and equipment to handle the most challenging and complex projects.

# AEROSPACE

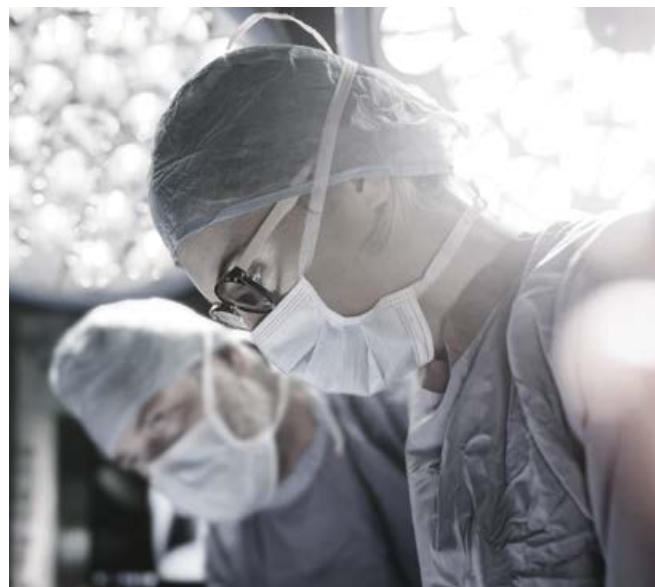

We specialize in manufacturing mission-critical components with extremely tight tolerances, such as blisks and IBRs, control surface components, curvic couplings, impellers, motion controls, turbine disks, blades and vanes, and more.

# MEDICAL

At C&A Tool, we're driving innovation in surgical and orthopedic device production, every day. With more than 125,000 implants produced each year—plus a wide range of instrumentation and other devices—whatever you need, C&A Tool can do it.

# INDUSTRIAL

For more than fifty years, customers have trusted C&A Tool as their go-to partner for industrial manufacturing, including components for automotive, energy and fuel systems, trucking and construction, public transit, marine and alternative energy.

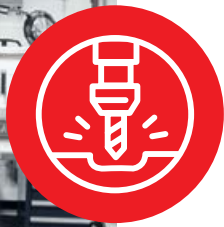

# PROVEN PROCESSES

No matter your industry, your specifications or your challenge, our experienced and skilled engineering and production team is ready to bring solutions.

From concept and design, to production and final delivery, we have the industry's most advanced capabilities and the largest collection of for-contract equipment in the country.

## MILLING

- ▶ 60+ Mills Onsite
- ▶ Full 5-Axis Capable

## TURNING

- ▶ 70+ Lathes Onsite
- ▶ Multi-Axis with Live Tooling Capable

## GRINDING

- ▶ 40+ Grinding Machines Onsite
- ▶ Curvic, OD/ID, Centerless, Out of Round, Vertical

## ADDITIVE MANUFACTURING

- ▶ 9 Additive Printers Onsite
- ▶ Titanium Ti64ELI, 17-4 Stainless Steel, Nickel Alloy 718

## ELECTRICAL DISCHARGE MILLING (EDM)

- ▶ 12 EDM Machines Onsite

## METROLOGY

- ▶ 16 Zeiss CMMs Onsite
- ▶ Roundness & Concentricity Analysis
- ▶ True 5-Axis Measurement
- ▶ 3D Laser & Light-based Interferometry

## CUSTOM SERVICES

From onsite programming and engineering, to rapid prototyping and product development—we have the expertise to deliver the solutions our customers need.

**60+** MILLING  
MACHINES
