## FOR IMMEDIATE RELEASE

# Velocity Medtech Continues Dedication to Improve Customer Experience with New Website Release

**Totowa, NJ, September 21, 2022** – Velocity Medtech (Velocity), announced today the release of a new website further highlighting the integrated capabilities available in cases, caddies, trays, implants, and surgical instruments as a comprehensive, single-source partner for medical device manufacturing. The new website is a continued demonstration of the company's commitment to improving the overall customer experience, delivering improved functionality, easy navigation, and a straightforward, direct means to connect with the Velocity team.

"[Velocitymedtech.com](https://velocitymedtech.com) has been thoughtfully designed to deliver a user experience that reflects the quality and expertise we serve our customers with day in and day out. It's always our goal to bring added value to our OEM and prospective customer's. As your full-service integrated partner in orthopedic medical devices, our experts do more than engage with you on your project, we collaborate end-to-end, guiding and supporting you every step of the way," says Gregg Olson, Vice President of Sales and Marketing at Velocity.

The new Velocity website is created with user experience and clear communication of capabilities and services in mind. The site features:

- Velocity's [Expertise](#), where partnerships, services, and a deeper dive into the unique capabilities that make Velocity stand out can be explored.
- A [Products](#) section including comprehensive descriptions and close-up images of cases and trays, caddies, implants, and instruments for transparency and clarity.
- A breakdown of Velocity's variety of [Services](#), for prospective customers to easily learn more about how Velocity can meet their needs and receive expedient quotes on projects.
- An [About Us](#) page, providing insight into what makes Velocity a trusted partner, continuing to bring precise specialization and opportunity to customers.

"We have clinical understanding, unparalleled experience in custom orthopaedic manufacturing, and acute focus on meeting the needs of the ultimate end customer," says Olson. "We're excited to have

a new website to further highlight the ways we can partner in the orthopaedic medical device manufacturing space.”
