Janco Inc. Launches New Division Specializing in Medical Packaging and Cleanroom Manufacturing

Rollinsford, N.H. – Janco, Inc. announced the launch of Janco Medical, a new division created from over 60 years of industrial manufacturing experience.

"Janco Inc. has served the medical packaging and products industry for decades," said Chris Melino, Director of Business Development, Janco Medical. "The launch of Janco Medical signifies our strengthened commitment to the market, providing a specialized, comprehensive solution focused on delivering projects on time and on budget."

Unlike others in the market, Janco Medical supports projects of any size - engineering creative, cost-effective solutions with high quality plastic and foam. A certified ISO 13485 and FDA registered contract manufacturer, their ISO 14644-1 Class 7 and 8 certified cleanrooms are supported by state-of-the-art assembly and packaging services - giving clients everything they need under one roof.

Janco Medical's expert engineering and operations team has been working together under Janco, Inc for decades - applying a highly personal approach to service that troubleshoots issues and keeps projects on schedule.

"As a family business, how we support customers has been central to our success," said Mark Janetos, CEO President of Janco, Inc. "We understand that a focus on precision is critical and, when combined with one-on-one service, it mitigates the risk of costly delays and profit loss."

Janco Medical already serves many leaders in the industry and has a high level of customer satisfaction as a result of their approach. "Janco creates an exceptional product while being flexible to meet our needs. They are transparent throughout the process and dedicated to delivering on time and on budget. I have complete trust in their expertise and commitment to our success." Jason Walker, Supply Chain Director, CELLTREAT

A distributor of Volara Foam and other high-quality medical grade materials, Janco Medical provides reliable sourcing to give customers the convenience of a one-stop service. To ensure compliance, Janco Medical's in-house machine shop and state-of-art equipment are backed by a fully-integrated Quality Management System that touches every step of the medical manufacturing process.

For more information, visit Janco Medical at Omtech in Chicago from June 11-13 at booth #445 or go to janco-medical.com.

About Janco Medical
