FOR IMMEDIATE RELEASE:

gSource Launches the Sierra™ Disc Prep Set for ALIF, LLIF and Customized Approaches

Emerson, NJ (October 3, 2025) - gSource announces the launch of the Sierra™ Disc Prep Set, a solution designed to simplify and elevate disc space preparation in spinal fusion surgery. Built for ALIF, LLIF, and customized approaches, the set empowers surgeons to achieve controlled, thorough disc space clearance with confidence. Each set is fully customizable to match a preferred technique. Surgeons select from a curated portfolio of instruments, ranging from elevators and curettes to distractors and rongeurs, crafting a set built to support their exact approach. Each instrument is organized in a sterilization case that keeps instruments bundled together in bracketed trays. Additional configurations will soon be available, expanding the set's versatility for more approaches.

Engineered for reliability, each instrument meets FDA and EU MDR compliance standards, offering both surgeon assurance and patient safety. The Sierra™ Disc Prep Set will be on display and available to order at NASS 2025 in Denver, giving surgeons and their teams an opportunity to experience it firsthand. To customize and order your Sierra™ Disc Prep Set today, visit gSource.com/DiscPrep.

About gSource

gSource was founded in 1999 and is committed to putting the finest instruments into the hands of surgeons and their teams. Since 2023, gSource has been part of the ARCH Medical Solutions family of companies, with the ability to leverage over twenty American-based ARCH Medical Solutions manufacturing facilities. With instruments primarily crafted from German surgical stainless steel, and recognized by their finely finished surface, gSource products are designed to perform with precise surgical function, continuing a tradition of craftsmanship while embracing modern innovation.

More than a source for quality instrumentation, gSource is an advocate for the surgical community. The company is relied upon to provide superior instrumentation for a range of procedures and do so in a time-critical fashion. With the ability to create entirely new instruments in a rapid and economical manner, and an inventory available for same day shipment, many world leaders and innovators in orthopedics and spine have found in gSource a trusted and reliable partner.
